

Alternative Funding

Featuring a Payment Portal
and Participant notifications

Optional Backup Funding Feature

Keeps the policy up to date when premium payment is declined.

- Backup Funding tracks the premium in arrears.
- Policy holder is contacted via email or text directing them to pay the amount they missed and authorize a one-time make up payment to pay what they owe*.
- The system will attempt to collect that premium on the next ACH and CC run and remit to the provider on the next billing cycle.

*This feature is available at the benefit providers discretion. It has a participant payment time limit. For payments outside the window, arrangements must be made with the provider.
